WORK EXPERIENCE

Geotab

Software Developer Intern · May 2021 to Aug. 2021 · Waterloo (remote)

- Designed, implemented, tested APIs for core products managing electric vehicle charging using **C#, ASP.NET Core**
- Built a webapp end to end to create, retrieve and verify promotion codes by constructing backend stored procedures, API, and frontend UI over iterative feedback process with **C#, T-SQL, CSS, HTML, Razor Pages**
- Carried out weekly releases to production and suggested process improvements with Gitlab, Octopus Deploy, and Appveyor for products serving *45+* major energy companies and *2000+* SmartCharge Rewards users
- Set up Git repo pipeline CI/CD and introduced test coverage in merge requests for new project

Intuit

Software Engineering Intern · Sept. 2020 to Dec. 2020 · Mississauga (remote)

- Built and tested TurboTax Online platform using **Java, XML, JSON**, simplifying tax returns for over *13 million* users
- Updated logic and UI for TurboTax pages on legacy monolithic codebase, utilized multiple services, closed 90 JIRA tickets
- Produced frontend for Mint Side Business with **Swift**, a financial management platform for *1000s* of new customers
- Integrated instant translations into git repo, reducing downtime by *4800%* from 24 hours to 30 minutes

Intuit

Software Developer Intern · Jan. 2020 to Apr. 2020 · Mississauga

- Architected **XML Transforming (XSLT)** solution crucial in large scale migration to the US infrastructure
- Developed **Python** scripts using **regex, XPath** to process data and generate XSLT files, eliminating *100s* of man-hours

Ontario Ministry of Children, Community, and Social Services

Software Engineering Intern · May 2019 to Aug. 2019 · Toronto

- Developed IBM Curam backend and Angular frontend for MyBenefits web service
- Created microservice stubbing pipeline using Java, **Spring Tool Suite**, and **Maven**, speeding up testing by *500%*

PROJECTS

Reddit TTS Video Generator

- Automated the generation of a reddit thread video by writing web scraper script using **Python, Selenium, MoviePy, PRAW** (Python Reddit API Wrapper) which screenshots comments on top reddit threads, adds text-to-speech, and compiles a video similar to popular channels on YouTube and TikTok

Cook Me! - Hack the North 2019

- Built webapp for users to browse images of food and receive recipes using **JavaScript** and **React**
- Hosted app with **Node.js**, designed UI with **Material-UI**, used **Google Vision AI, Instagram API** backend

ACTIVITIES

University of Waterloo A Capella Club · Musical InterDudes

Performed in an auditioned a cappella group focused on musical comedy, singing and dancing in weekly rehearsals and multiple concerts with a 5 hour/week commitment
